

Munford Middle School Title I Plan 2019-2020

Munford Middle School

Vision

Munford Middle School will empower students through innovative teaching and learning.

Mission

To ensure all students are empowered to apply 21st century skills that prepare them for success college and career.

Beliefs

We believe that when students are given equitable opportunities, they can all learn. It is our responsibility to prepare students for the future and provide a safe and secure learning environment.

Personalized Learning

Objectives

- Support personalized learning opportunities that encourages proficiency in all content areas.

Critical Initiatives

- Teachers will participate in monthly, ongoing professional development focused on differentiation and personalized learning led by the Technology Integration Specialist and Admin.
- Teachers will implement classroom practice and strategy to improve student achievement in math.
- Teachers will implement classroom practice and strategy to improve student achievement in reading.

Positive Culture

Objectives

- Utilize a positive support system that fosters social and emotional growth for all students.

Critical Initiatives

- Teachers will participate in monthly, ongoing professional development focused on social and emotional growth for students led by the Technology Integration Specialist and Admin.
- Students will participate in continuous learning to improve their social and emotional growth.
- MMS will increase parent and community communication in order to ensure that all stakeholders are informed on what is taking place at MMS.

Innovation

Objectives

- Students will engage in an inquiry based learning environment that incorporates 21st century skills.

Critical Initiatives

- Teachers will attend on-going professional development locally and globally to improve professional learning of innovative best practices.
- All teachers will implement STEAM (science, technology, engineering, arts, mathematics) instruction that connects to the Engineering Design Process.
- MMS will communicate the STEM initiative with stakeholders and give them opportunities to be involved in their child's learning. This involvement may include learning showcases and/or expert visits.
